Coolant Analysis Sample Kit
TY27787 **\$47.70**
Coolant-Gard II Test Strips
TY26605 **\$27.86**

Take the guesswork out of machine maintenance with John Deere Fluid Analysis Kits.

Preventative Maintenance & Warranties

Testing of oil and coolants must be done at recommended intervals per your John Deere machine's warranty.

See Nortrax about maintenance contracts or to ask about what may be required for your machine's warranty.

Oil Analysis

The universal oil analysis kit provides a comprehensive lubricant analysis appropriate for all compartments. Monitor for moisture, wear debris, contaminants, and remaining useful life of engine oil, hydraulic fluid, or powertrain lubricants.

Easy Sampling

Convenience is the whole point, so we keep it simple:

- Extract fluid samples.
- Record fluid and machine data.
- Send sample bottle and form to the lab.

That's it. One of eight independent labs will process your sample quickly and accurately.

Immediate Notifications and Alerts

If your fluid sample indicates a serious problem, both you and Nortrax will be notified via email.

- A Nortrax TSS (Technical Support Specialist) is notified by Deere's IATC (Intelligent Alert Triage Center) and the appropriate Nortrax Service Department is alerted.

John Deere Fluid Analysis Program

John Deere oil, fuel, and coolant analysis kits can be used to test all brands of fluids and equipment. Be sure to use the appropriate analysis kit for each type of fluid. Register on the John Deere Fluid Analysis Program website so you can access your historical test data, submit samples and create management reports.

You will have the ability to:

- View lab results
- View sample diagnoses
- Set sample condition alerts
- View summaries of equipment condition

Contact your Nortrax parts or service department to order your kit or for more information.
